

Maths focus for the week

- Solve additions and subtractions with numbers up to 50
- Use pictures to show understanding

Please provide your children with some number sentences which allow them to add or subtract a one digit number from a 2 digit number with numbers up to 50

e.g.  $21 + 4 =$  or  $34 - 6 =$

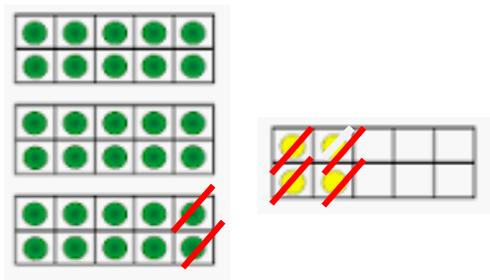

Your children can solve these practically and can also practise writing their number sentences down. They can also use pictures to show how they worked it out:

$$21 + 4 = 25$$

Use 'Tens' rods and 'Ones' cubes to make each number and add them together. You can draw the number sentence like it is shown here.

Tip: To physically move resources make some of your own out of sticks and stones from the garden!

$$34 - 6 =$$

Draw tens frames to make the number using tens and ones. Then cross of the right amount to help you with your subtraction.

Tip: Use counters, beads, buttons or anything you can find around the house to help you.

Remember that you can find learning on Mathletics to support this week's focus as well.

Practice working through different addition and subtractions to 50 this week.

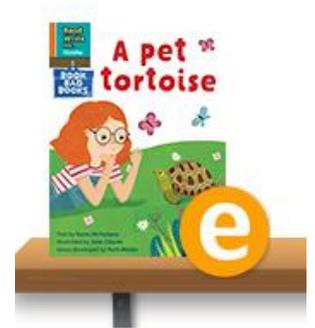

Can you show how you worked out your calculations another way?

## Literacy

Literacy this week is going to be based on a book called

### **‘A Pet Tortoise’.**

All children can have access to this free e book online. I have created a class log in via the Oxford Owl website which gives us access to a free library. I will be using these to help focus our work each week so we are all accessing the same stories.

Please use the link: <https://www.oxfordowl.co.uk/for-home/find-a-book/library-page/>

Click on ‘My Class Log in’ and sign in using: Username: HighBickington Password: ClassTwo

Click on ‘My bookshelf’ and in the top right tool bar type in the book for the week E.g. A Pet Tortoise. You will then see the book on the self. Click it to read. You can zoom into the text to enlarge it if you need to.

#### Activities based on A Pet Tortoise:

- Read the book with an adult and talk about it together.
- Notice the phonics sounds in the story using **air, igh** and **ar**. Can you find and list words using these phonic sounds? Can you think of any more of your own?
- **Red Words** – Look at the red words in the story. Write these on cards, paper squares on in another creative way. Can you learn to read all these words on sight?

**are, my, I, you, what, your, to, be, of, go, the, put**

- Practise re-reading the story so you become fluent.
- Draw a picture and describe your own pet using sentences.
- Use the ideas from the books to make a book of your own about how to look after your pet.
- Can you find out and write a new fact about your pet?

\* If you don't have a pet, then choose a pet you would love to own to complete the activities.

#### Spelling:

Keep practising your common exception word spellings. These are words which you should eventually know off by heart and they will really help you in your writing.

**Remember** – Use your interests to create your own projects as well including practising musical instruments, art, building, cooking etc. Continue to enjoy spending time together and don't forget to exercise, it's great for your mental health 😊

The activities suggested can be adapted in any way you see fit and should help to provide some structure to the day.
